

UiO : **Faculty of Dentistry**  
University of Oslo

ADEE 2018  
Exhibition

University of Oslo,  
Norway

## ADEE Exhibition:

The ADEE Executive Committee and ADEE office work closely with leading suppliers in the dental education market to ensure we delivery a useful, interesting and up to date exhibition of products and services as part of the ADEE annual scientific meeting.

This year is no different. An array of the world's leading suppliers have travelled to Oslo to share with you their innovations, research, product developments and service.

The ADEE exhibition is a core element of the annual meeting of ADEE. Our association relies heavily on these suppliers to enable a successful meeting not only from a financial but also a networking and social perspective. We therefore encourage and urge you to please spend time engaging with and exploring what the 2018 exhibition has on offer. With 22 suppliers on site you are guaranteed to find something of interest.

You can find a listing of the meeting sponsors and exhibitors on the following pages. On behalf of the ADEE we express our sincere gratitude to each of these organisations for their support of ADEE and we look forward to continuing to evolve the valuable collaborations we have with them.

**Prof Petra Hahn**  
**ADEE Treasurer**

**Mr Denis Murphy**  
**ADEE CAO**

## Event and Application Sponsors:

UiO • Faculty of Dentistry  
University of Oslo

## Exhibitors:

The logo for AMGEN, featuring the word "AMGEN" in a bold, blue, sans-serif font with a registered trademark symbol (®) to the upper right.

---

Oncology

Osteonecrosis of the jaw (ONJ) is a complication that can be associated with the use of bone-protecting (antiresorptive) agents that are used for patients with cancer and bone metastases.

Dentists can play a pivotal role in prevention and management of ONJ.

Visit our stand to learn more about the signs and symptoms of ONJ and approaches to manage this condition.

AMGEN has grown to be one of the world's leading independent biotechnology companies that focuses on areas of high unmet medical need and strives for solutions that improve health outcomes and dramatically improve peoples' lives.

<http://amgen.com>

Anatomy Next is a 3D simulation software company for health education, training, and visualization.

The Anatomy Labs by Anatomy Next is a virtual-reality software that allows repeated dissection of the human body for medical students and instructors. The Anatomy Labs provides users with a very lifelike dissection experience with the highest quality 3D models derived from real radiological data, giving the user a fun, interactive, quest-based experience.

<http://www.anatomynext.com/>

Bien-Air, a Swiss company, have been designing and producing hand-pieces for nearly 60 years. Based in the heart of the watch making industry, m Bien-Air produce a range of high quality precision instruments.

TORNADO and TORNADA S are the world's most powerful standard and small head turbines! Our CA 1:5 EVO 15 Contra Angle with COOLTOUC+ has built in patient safety and is guaranteed not to raise above body temperature.

iChiropro, our implant motor, driven by iPad, simplifies implant placemnet and produces a patient record.

Coma and visit us at our stand to experience these and other innovations from Bien-Air.

Clinical Assessment and Feedback System (CAFS by Invent Partners). Student centered software application for dental schools, developed by Invent Partners in conjunction with the University of Birmingham.

- CAFS helps schools to document each student's practical experience providing the basis of an audit able student record as required by the GDC and other regulatory bodies worldwide.
- CAFS is easy to use for continuous monitoring of student progress that quickly identifies students in need of support by allowing real time reporting of their progress
- CAFS records sufficient detail to accommodate very sophisticated and granular progress monitoring targets or term marking criteria

Replaces paper based systems with ease of recording day to day activity, centralized record keeping that is safely archived. CAFS is now implemented in world ranking universities: Hong Kong Dental School, University of Birmingham, Bristol University.

We look forward to seeing you in Oslo at our stand. To learn more about CAFS or to book 121 meetings whilst in Oslo please do not hesitate to contact us

# MOOG

Moog Simodont offers a virtual reality environment (a 'virtual' phantom head) where students can train manual dexterity, cariology, crown and endodontic access procedures on real world 3D tooth models. The drill hand piece provides highly realistic feedback so that the student has an exact feeling of the objects and different materials that are being worked on.

Simodont combines Moog's expertise in haptic technology and ACTA's (Academic Centre for Dentistry in Amsterdam) experience in dental education to help train students in over 80 dental schools around the world. The system is continuously expanded with further functionalities and tooth models.

<http://www.moogdentaltrainer.com>

NIOM (Nordic Institute of Dental Materials) has served Nordic dental health for 45 years.

We help dental professionals and dental health authorities make safe and effective choices on dental biomaterials by ensuring high standards of material quality and through promoting patient safety.

<http://niom.no>

Founded in 2011, Futudent is now the leading provider of dental digital video solutions globally. Futudent is dedicated to bringing dentistry to the digital era with improved and easily accessible treatment planning, patient education, documentation and skills training, at a price point for everyone.

Futudent is the only dental video solution provider with integrated hardware, software and cloud, for seamless workflow. Futudent is developed by dentists for dentists, to enhance imaging in everyday dental workflow.

<https://www.futudent.com/en>

# PLANMECA

Planmeca Oy is a global leader in many fields of healthcare technology, with products distributed in over 120 countries worldwide. Our product range covers digital dental units, world-class 2D and 3 D imaging devices, and comprehensive CAD/CAM and software solutions.

Headquartered in Helsinki Finland, we are the largest privately held company in the field of dental equipment and the parent company of the Planmeca Group. The group's turnover in 2016 was €730M, employing nearly 2,700 people worldwide.

Visit us at our stand in the exhibition hall or online at

<http://planmeca.com>

The needs of a dental school are vast, and differ greatly across the globe. Over the last 20 plus years we have worked closely with schools across 5 continents to build a product that meets and exceeds the requirements of dental schools all over the world.

Salud for Education has been specifically designed for the unique teaching and treatment environment found in dental schools and hospitals. It combines educational and student progress tracking with a comprehensive clinical management system allowing students and authorisers to work in an integrated environment, using Salud as a teaching aid.

Student Patient assignment is automated as Salud for Education easily manages the demographic and related details of a large master index with excess of 100,000 patients. Salud for Education presents a wealth of opportunity to dental education and has the potential to create a great impact on daily activities and operational efficiency of dental universities and schools.
