Dear ADEE members, colleagues and friends,

It is my great pleasure to welcome you to ADEE 2024 being held in the historic city of Leuven. While gathered here together we will explore how the rise of AI within the education sector is altering the way we teach and practice. The impact of AI seems to have been unsuspected and rapid, however as has always been the case with regards to the integration of technologies Oral Health Professional Education faculty are for the most part responding with enthusiasm and creativity.

The ADEE Executive and Leuven Local Organising Committee under the leadership of Bart Van Meerbeek, KU Leuven Chair of the Department of Oral Health Science, Els Wierinck Education Director Dentistry, and Local Organising Committee Chair Katleen Van Damme, have created an interesting and interactive programme of events. We get the opportunity to hear from local and international expertise, engage and interact in new technologies and of course network with colleagues and industry partners.

Importantly ADEE 2024 is giving over 170 colleagues the opportunity to share their research, learning and innovations through one of our delegate presentation slots. This alone demonstrates the importance of ADEE’s annual meeting to its membership. While inclusion of so many colleagues works means delegates must make choice on which session to attend the Executive find it important to provide an opportunity to members to share their work.

Ranging from nutrition to well being, student engagement to entrustable professional activities, the variety of workshops, special interest groups and communities of practice being offered provide additional opportunities for you to delve deeper into some of the current hot topics in our profession. We are confident the sessions will trigger questioning and dialogue not only around the future of AI but oral health professionals’ education itself.

As always we are delighted to have the FEHHD meeting hosted within our meeting structure and this year they are revisiting their 2016 ‘competency framework for aspiring deans and heads of dental schools’ and the session promises to be of considerable value to senior academics. We also welcome those attending the ‘Lage Landen’, a pre meeting session of senior faculty from Belgian and the Netherlands.

Of course its not all work. The programme includes ample opportunity for networking and social events including an evening at the Faulty Club on Sunday and De Hoorn on Monday night.

I hope to see many of you throughout the meeting and look forward to reconnecting with you.

Prof Brian O’Connell
ADEE President 2024-2025

Professor Brian O’Connell has been Dean of the Faculty of Health Science, Trinity College Dublin, Ireland since 2021. He is Professor of Restorative Dentistry, Dublin Dental University Hospital, Trinity College Dublin, Ireland, where he served as Dean of Dental Affairs, 2015-2021. Brian has recently served as the Ninety-ninth President of the IADR, during 2022-23 and will be ADEE President 2024 - 2025.
Welcome to Leuven!

KU Leuven is proud to announce that the 2024 Annual Meeting of the Association for Dental Education in Europe (ADEE) will be held from 7 until 10 September 2024 in the beautiful city of Leuven (Belgium).

The overall theme of the 2024 conference is ‘Artificial Intelligence in Oral Health Professionals’ Education’. We very much look forward to meeting the many colleagues and to delve into the use of AI in dental education, exploring its impact on student learning and teaching practices, and the benefits and challenges it presents for educators and students.

There are many good reasons to come to Leuven for the next ADEE meeting: It is the home to Europe’s most innovative University; It is perfectly accessible 20 minutes from the airport; It is one of the world’s prime regions for health, high-tech and creativity; It is a sustainable choice; It is a vibrant student city with a rich beer culture; and it is a city with centuries-old cultural heritage. Come see for yourself what makes Leuven so great and boast to your colleagues and friends you got to visit one of the high ranking European Best Destinations!

We look forward meeting you in Leuven.
Location and Venue
About Leuven

ADEE is thrilled to announce that our annual conference will be held in Leuven, Belgium, between the 7th and 10th September 2024. Nestled in the heart of Belgium, Leuven is a city that seamlessly blends history and a modern European ethos, offering ADEE attendees a unique experience.

Leuven's cobbled streets and historical almost fairytale charm, is a unique experience. As you ramble through the city, you'll find yourself surrounded by centuries of history, with ancient architecture coexisting harmoniously with contemporary innovations. The city's atmosphere is vibrant, reflecting its rich cultural tapestry and strong academic tradition.
At the core of Leuven's vitality is KU Leuven, one of the oldest universities in Europe. The presence of the University infuses the city with youthful energy, creating a dynamic ambiance that permeates its bustling squares and cozy cafes. The blend of academic tradition and a lively social scene makes Leuven an ideal setting for the ADEE conference.

As conference attendees gather in Leuven for ADEE’s annual event, they will have the opportunity to immerse experience the city's unique blend of tradition and progress. The conference venue on the KU Leuven campus, surrounded by the city’s cultural richness, will provide an inspiring backdrop for the exchange of ideas, informal networking and the forging of new connections.
THE FACULTY OF MEDICINE-BIOMEDICAL SCIENCES CAMPUS

The Faculty of Medicine-Biomedical Sciences Campus at Gasthuisberg in Leuven stands out as the perfect spot for our annual meeting in 2024 due to its harmonious blend of academic tradition, accessibility, and the location within Leuven itself. KU Leuven campus and its faculty are renowned for cutting-edge research and education in the medical sciences, providing an environment that fosters intellectual exchange and collaboration.

The strategic location just outside Leuven's town center ensures ease of access by bus, while the option for a leisurely 20-minute walk to nearby hotels and restaurants adds a touch of charm to the experience.

The historical and cultural richness of Leuven, coupled with the state-of-the-art facilities at Gasthuisberg, creates an ideal backdrop that promises to enhance the quality and significance of our annual meeting.

A.I. in Oral Health Professionals’ Education
Social and Special Event Sponsors

A heartfelt thank you to the sponsors of the ADEE 2024 meeting social and special events. Your generous support makes this gathering a memorable success. We deeply appreciate your contribution to our community.
Leuven is a small city with an easy accessible car free pedestrian centre. This means many locals are accustomed to walking and use of the city public bus service and bicycle rental scheme. We encourage you to do the same. KU Leuven campus Gasthuisberg is located at the outskirts of the city in a newly developed medical campus. This is well services by the No 3 and No 600 bus routes depending on where your hotel is located. The campus (at one extreme of the city) is an approximate 45 Min walk or a 20 minute bus ride from the train station (at the other extreme of the city).
Day 1
Sunday 8th September
A.I. in education

Day One at ADEE 2024 will focus on how we as academics can influence, manage and encourage ethical use of AI in the academic setting. We need to upskill our understanding of these new academic resources and integrate their usage into our daily lives if we are to remain current.

Our students are well informed and in many cases ahead of the curve in this regard and we must thus empower them with concepts of ethical and responsible use of AI. The programme will feature a keynote panel discussion, workshops, e-posters and community of practice, special interest groups all with relevance to assessment and AI.

Day 2
Monday 9th September
A.I. in dental practice

Within our clinical and practice management environments, AI has in fact been at play for some years. This can vary from taken for granted transcription, graphics and other technologies to more clinically focused AI assisted decision making.

Ensuring we, as academic keep abreast of these new technologies is essential so on day two we focus on how such technologies can be incorporated into our workflows.

Day 3
Tuesday 10th September
A.I. as an enabler of sustainability

AI when effectively used can reduce waste and error, enable easier access and add to a more sustainable practice environment be it academic or clinical.

Through this theme on day three we will showcase some examples from industry as well as academia on how AI is help make sustainability

Invited Speakers

Maarten De Vos has a joint appointment as BOFZAP in the Departments of Engineering and Medicine at KU Leuven after being Associate Professor at the University of Oxford, United Kingdom, and Junior Professor at the University of Oldenburg, Germany. He obtained an MSc (2005) and PhD (2009) in Electrical Engineering from KU Leuven, Belgium. His academic work focuses on AI for healthcare monitoring and innovative biomedical monitoring for daily life applications. He is renown for the derivation of personalised biosignatures of patient health and the incorporation of smart analytics into wearable sensors.

His pioneering research in the field of mobile real-life brain-monitoring has won several innovation prizes, among which the prestigious Mobile Brain Body monitoring prize in 2017, the Children's Prize for best childhood innovation in 2018, the Martin Black Prize for the best paper in Physiological Measurements in 2019 and in 2021 he received the IEEE EMBS Benelux award for best paper in the biomedical field.

He has been guest editor for International Journal of Clinical Neurophysiology, Sensors and Physiological Measurements and is currently on the editorial board of Journal of neural engineering, IEEE journal of biomedical health informatics and Nature Digital Health.

Maarten has a strong interest in translational research, he co-founded Circadian Therapeutics with the aim to bring innovative home-monitoring solutions to people suffering from sleep and circadian disorders and is programme director of Benefit, a medical innovation programme.

Falk Schwendicke is currently Professor for Conservative Dentistry and Periodontology at the Ludwig-Maximilians-Universität München, Germany. His research focuses are on cariology, artificial intelligence, health economics and health services research. He is one of the most highly cited researchers in dentistry. Prior to his current position Falk was Head of the Department of Oral Diagnostics, Digital Health and Health Services Research at Europe’s largest university hospital, the Charité in Berlin, Germany.

He also is the founding director of the Berlin Institute of AI and Health Policy and a Visiting Fellow at the University of Otago, New Zealand.
Reinhilde Jacobs is dentist, Doctor in Dental Sciences (PhD University of Leuven), periodontologist (KU Leuven) and Master in Dental Radiology (University of London). She is full professor at the University of Leuven and visiting professor at Karolinska Institutet, Stockholm, Sweden and the Dalian Medical University in China. R. Jacobs is heading the omfs impath research group of the KU Leuven (omfsimpath.be) and the clinical center of dentomaxillofacial radiology (UZleuven).

In 2013, she received a Dr Honoris Causa at the "Iuliu Hatieganu" University of Medicine and Pharmacy in Cluj-Napoca. She is involved in many multidisciplinary and interuniversity research collaborations, with a specific focus on imaging research, artificial intelligence and bioprinting. She has been actively participating in 5 European projects and is (co-)author of 5 books and more than 550 publications in peer-reviewed journals besides multiple invited lectures and publications in other journals or books. Scopus (2022): h:72

Peter Claes graduated in 2002 at the KU Leuven, department of Electrical engineering (ESAT), with a major in multimedia and signal processing. In 2007, he obtained a PhD in engineering, specifically on medical image analysis, at the KU Leuven, where he developed a computer based craniofacial reconstruction system for victim identification. He did a postdoc at the Melbourne Dental School, University of Melbourne from 2007 until 2011. This gave him the opportunity to interact deeply with other disciplinary researchers resulting in his transdisciplinary research portfolio with a versatile international network. In 2018-2019, he was a visiting scholar at the University of Oxford under Allison Noble at the Biomedical Engineering Department, UK.

Since 2014, he is an honorary fellow at the Murdoch Children’s Research Institute, Melbourne, Australia. Currently he is a joint BOF-ZAP research professor at the department of ESAT-PSI and the department of Human Genetics, KU Leuven, Belgium. Peter Claes is head of the multidisciplinary laboratory of Imaging Genetics.
